

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The Behavior Rating Inventory of Executive Function® (BRIEF®)

The BRIEF-A is composed of 75 items within nine nonoverlapping theoretically and empirically derived clinical scales: Inhibit, Self-Monitor, Plan/Organize, Shift, Initiate, Task Monitor, Emotional Control, Working Memory, and Organization of Materials.

Two broad indexes (Behavioral Regulation and Metacognition), an overall summary score, and three validity scales (Negativity, Inconsistency, and Infrequency) are included.

The BRIEF® is a proprietary instrument and is available online from PAR® at www4.parinc.com. A fee is associated with the BRIEF® and is dependent upon various factors, such as if the BRIEF® is purchased as a kit (i.e., questionnaires, manuals, and scoring forms) or in individual components.
