

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Indicate how much you agree or disagree with each of the following statements by placing a single checkmark (like this: ::) along each line between STRONGLY DISAGREE and STRONGLY AGREE. Scoring Procedure and Interpretation

Each item is scored on a scale ranging from 1 for "Strongly Disagree" to 7 for "Strongly Agree." The scores from items 1-3, 5, 6, and 8-10 are used as the raw scores. Items 4 and 7 should be reverse-scored (raw score = 8 minus reverse-keyed item score) (Heinz et al., 2006). A total score is obtained by averaging all items (Sussner et al., 2006).
