

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Pain Catastrophizing Scale

The Pain Catastrophizing Scale includes 13 items that measure heightened negative cognitive and affective pain responses. Each item is rated on a 5-point Likert style scale from 0 (not at all) to 4 (all the time) with higher scores indicating more catastrophizing. A total score for the Pain Catastrophizing Scale can be calculated as the average of all responses.
