

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Faces Pain Scale - Revised (FPS-R)

The FPS-R shows a set of faces indicating how much pain they are in. The left side shows a face with no pain. From left to right, the faces indicate increasing levels of pain until the far right, which shows a high amount of pain. Each face has a score associated with it.
